Helping patients better understand their health insurance coverage is one of our top priorities

As a reminder, your patients may have new health insurance plans. Some may be unfamiliar with their updated coverage details or out-of-pocket responsibilities. To help avoid treatment delays, take a moment to verify each patient's insurance information at their next visit.

For additional support, Genentech Ophthalmology Access Solutions can conduct a BI to help you determine your patient's coverage. You can also view BI Reports for all your patients enrolled in Genentech Ophthalmology Access Solutions via My Patient Solutions.

[Learn More](#)

If your patients have financial concerns related to their Genentech medicine, we may be able to help

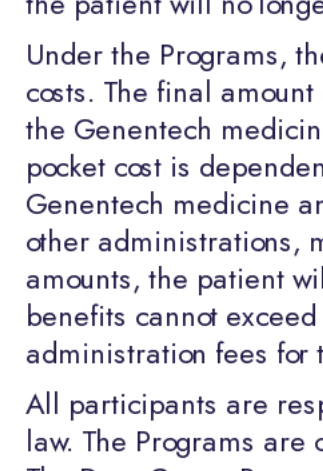

At Genentech, we understand patients may have financial concerns related to their treatment. We are dedicated to helping ensure our medicines are accessible for the patients who have been prescribed them.

Please note that annual co-pay limitations and eligibility requirements may have been updated for the new year. Visit [VABYSMO-HCP.com](https://www.vabysmo-hcp.com) for the latest information and resources to help your patients get the support they need.

GENENTECH PATIENT SUPPORT SERVICES

are here to help your patients get their Genentech Ophthalmology treatment

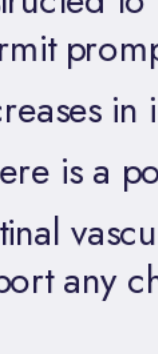

Genentech Ophthalmology Co-pay Program*

The Genentech Ophthalmology Co-pay Program provides financial assistance to eligible commercial patients to help with their co-pays, co-insurance or other out-of-pocket (OOP) costs.

Eligible patients pay as little as:

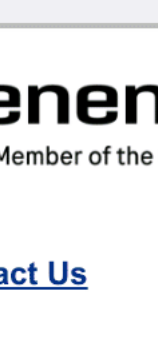

- \$0 per drug co-pay or co-insurance until the \$15,000 annual limit is reached
- \$0 per drug administration co-pay or co-insurance until the \$1,000 annual limit is reached

Genentech Ophthalmology Access Solutions^{†‡}

Genentech Ophthalmology Access Solutions offers a range of access and reimbursement support for your patients and practice:

- Benefits investigations and benefits reverification support
- Prior authorization resources
- Information about authorized specialty pharmacies and specialty distributors
- Sample billing and coding information
- Resources for denials and appeals
- Referrals to financial assistance options, including enrollment into the Genentech Ophthalmology Co-pay Program for eligible commercially insured patients

Genentech Patient Foundation[§]

The Genentech Patient Foundation provides eligible patients their Genentech treatment for free.

Patients will receive free Genentech medicine if they are in 1 of 3 insurance and financial situations:

- Have no insurance or insurance that doesn't cover their Genentech treatment
 - For a household of 1 to 4 people, have a total yearly income under \$150,000. For households with more than 4 people, add \$25,000 for each additional person
- Have insurance that covers their Genentech treatment
 - Have an out-of-pocket maximum set by the health insurance plan that exceeds 7.5% of their household income
 - Have a household size and income within certain guidelines

*The Product and Administration Copay Programs ("Programs") are valid ONLY for patients with commercial (private or non-governmental) insurance who have a valid prescription for a Food and Drug Administration (FDA)-approved indication of a Genentech medicine. The Programs are not available to patients whose prescriptions are reimbursed under any federal, state, or government-funded insurance programs (included but not limited to Medicare, Medicare Advantage, Medicaid, TRICARE, Department of Defense, or Veterans Affairs Programs) or where prohibited by law or by the patient's health insurance provider. If at any time a patient begins receiving prescription drug coverage under any such federal, state or government-funded healthcare program, the patient will no longer be eligible for the Programs.

Under the Programs, the patient may be required to pay a copay for drug costs and a copay for administration costs. The final amount owed by a patient may be as little as \$0 for the Genentech medicine or administration of the Genentech medicine (see Program specific details available at the Program website). The total patient out-of-pocket cost is dependent on the patient's health insurance plan. The Programs assist with the cost of the Genentech medicine and the administration of the Genentech medicine only. It does not assist with the cost of other administrations, medicines, procedures or office visit fees. After reaching the maximum Programs' benefit amounts, the patient will be responsible for all remaining out-of-pocket expenses. The amount of the Programs' benefits cannot exceed the patient's out-of-pocket expenses for the cost of the Genentech medicine or administration fees for the Genentech medicine.

All participants are responsible for reporting the receipt of all Programs' benefits as required by any insurer or by law. The Programs are only valid in the United States and U.S. Territories and are void where prohibited by law. The Drug Copay Program shall follow state restrictions in relation to AB-rated generic equivalents (e.g., MA, CA) where applicable. The Administration Copay Program is not valid for patients who reside or receive treatment in a restricted state (e.g. Massachusetts or Rhode Island). No party may seek reimbursement for all or any part of the benefit received through the Programs. The value of the Programs is intended exclusively for the benefit of the patient. The funds made available through the Programs may only be used to reduce the out-of-pocket costs for the patient enrolled in the Programs. The Programs are not intended for the benefit of third parties, including without limitation third party payers, pharmacy benefit managers, or their agents. If Genentech determines that a third party has implemented programs that adjust patient cost-sharing obligations based on the availability of support under the Programs and/or excludes the assistance provided under the Programs from counting towards the patient's deductible or out-of-pocket cost limitations, Genentech may impose a per fill cap on the cost-sharing assistance available under the Programs. Submission of true and accurate information is a requirement for eligibility and Genentech reserves the right to disqualify patients who do not comply with Genentech Program Terms and Conditions. Genentech reserves the right to rescind, revoke or amend the Programs without notice at any time.

Additional terms and conditions apply. Please visit the copay Program website for the full list of Terms and Conditions.

†The completion and submission of coverage- or reimbursement-related documentation are the responsibility of the patient and health care provider. Genentech makes no representation or guarantee concerning coverage or reimbursement for any service or item.

‡Genentech provides coverage and reimbursement services to patients to help them understand benefits, coverage and reimbursement. Genentech provides these services to patients only after a health care provider has prescribed a Genentech product.

§Genentech reserves the right to modify or discontinue the program at any time and to verify the accuracy of information submitted.

[Learn More](#)

Indications

VABYSMO (faricimab-svoa) is a vascular endothelial growth factor (VEGF) inhibitor and angiotensin-2 (Ang-2) inhibitor indicated for the treatment of patients with Neovascular (Wet) Age-Related Macular Degeneration (nAMD), Diabetic Macular Edema (DME), and Macular Edema following Retinal Vein Occlusion (RVO).

Important Safety Information

Contraindications

VABYSMO is contraindicated in patients with ocular or periocular infection, in patients with active intraocular inflammation, and in patients with known hypersensitivity to faricimab or any of the excipients in VABYSMO.

Warnings and Precautions

- Endophthalmitis and retinal detachments may occur following intravitreal injections. Patients should be instructed to report any symptoms suggestive of endophthalmitis or retinal detachment without delay, to permit prompt and appropriate management.
- Increases in intraocular pressure have been seen within 60 minutes of an intravitreal injection.
- There is a potential risk of arterial thromboembolic events (ATEs) associated with VEGF inhibition.
- Retinal vasculitis and/or retinal vascular occlusion have been reported. Patients should be instructed to report any change in vision without delay.

Adverse Reactions

The most common adverse reactions (≥5%) reported in patients receiving VABYSMO were cataract (15%) and conjunctival hemorrhage (8%).

You may report side effects to the FDA at (800) FDA-1088 or www.fda.gov/medwatch. You may also report side effects to Genentech at (888) 835-2555.

GENENTECH PATIENT SUPPORT SERVICES

are here to help your patients get their Genentech Ophthalmology treatment

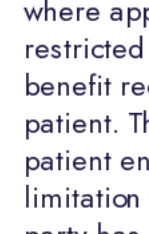

Genentech Ophthalmology Co-pay Program*

The Genentech Ophthalmology Co-pay Program provides financial assistance to eligible commercially insured patients to help with their co-pays, co-insurance or other out-of-pocket (OOP) costs.

Eligible patients pay as little as:

- \$0 per drug co-pay or co-insurance until the \$15,000 annual limit is reached
- \$0 per drug administration co-pay or co-insurance until the \$1,000 annual limit is reached

Genentech Ophthalmology Access Solutions†‡

Genentech Ophthalmology Access Solutions offers a range of access and reimbursement support for your patients and practice:

· Benefits investigations and benefits reverification support

· Prior authorization resources

· Information about authorized specialty pharmacies and specialty distributors

· Sample billing and coding information

· Resources for denials and appeals

· Referrals to financial assistance options, including enrollment into the Genentech Ophthalmology Co-pay Program for eligible commercially insured patients

Genentech Patient Foundation§

The Genentech Patient Foundation provides eligible patients their Genentech medicine for free.

Patients will receive free Genentech medicine if they are in 1 of 3 insurance and financial situations:

· Have no insurance or insurance that doesn't cover their Genentech treatment

- For a household of 1 to 4 people, have a total yearly income under \$150,000. For households with more than 4 people, add \$25,000 for each additional person

· Have insurance that covers their Genentech treatment

- Have an out-of-pocket maximum set by the health insurance plan that exceeds 75% of their household income

- Have a household size and income within certain guidelines

*The Product and Administration Copay Programs ("Programs") are valid ONLY for patients with commercial (private or non-governmental) insurance who have a valid prescription for a Food and Drug Administration (FDA)-approved indication of a Genentech medicine. The Programs are not available to patients whose prescriptions are reimbursed under any federal, state, or government-funded insurance programs (included but not limited to Medicare, Medicare Advantage, Medicaid, Medicaid, TRICARE, Department of Defense, or Veterans Affairs Programs) and where prohibited by law or by the patient's health insurance provider. If at any time a patient begins receiving prescription drug coverage under any such federal, state or government-funded healthcare programs, the patient will no longer be eligible for the Programs.

Under the Programs, the patient may be required to pay a copay for drug costs and a copay for administration costs. The final amount owed by a patient may be as little as \$0 for the Genentech medicine or administration of the Genentech medicine (see Program specific details available at the Program website). The total patient out-of-pocket cost is dependent on the patient's health insurance plan. The Programs assist with the cost of the Genentech medicine and the administration of the Genentech medicine only. It does not assist with the cost of other administrations, medicines, procedures or office visit fees. After reaching the maximum Programs' benefit amounts, the patient will be responsible for all remaining out-of-pocket expenses. The amount of the Programs' benefits cannot exceed the patient's out-of-pocket expenses for the cost of the Genentech medicine or administration fees for the Genentech medicine.

All participants are responsible for reporting the receipt of all Programs' benefits as required by any insurer or by law. The Programs are only valid in the United States and U.S. Territories and are void where prohibited by law. The Drug Copay Program shall follow state restrictions in relation to AB-rated generic equivalents (e.g., MA, CA) where applicable. GENENTECH PATIENT SUPPORT SERVICES

are here to help your patients get their Genentech Ophthalmology treatment

Genentech Ophthalmology Co-pay Program*

The Genentech Ophthalmology Co-pay Program provides financial assistance to eligible commercially insured patients to help with their co-pays, co-insurance or other out-of-pocket (OOP) costs.

Eligible patients pay as little as:

- \$0 per drug co-pay or co-insurance until the \$15,000 annual limit is reached
- \$0 per drug administration co-pay or co-insurance until the \$1,000 annual limit is reached

Genentech Ophthalmology Access Solutions†‡

Genentech Ophthalmology Access Solutions offers a range of access and reimbursement support for your patients and practice:

- Benefits investigations and benefits reverification support
- Prior authorization resources
- Information about authorized specialty pharmacies and specialty distributors
- Sample billing and coding information
- Resources for denials and appeals
- Referrals to financial assistance options, including enrollment into the Genentech Ophthalmology Co-pay Program for eligible commercially insured patients

Genentech Patient Foundation§

The Genentech Patient Foundation provides eligible patients their Genentech medicine for free.

Patients will receive free Genentech medicine if they are in 1 of 3 insurance and financial situations:

- Have no insurance or insurance that doesn't cover their Genentech treatment
- For a household of 1 to 4 people, have a total yearly income under \$150,000. For households with more than 4 people, add \$25,000 for each additional person
- Have insurance that covers their Genentech treatment
- Have an out-of-pocket maximum set by the health insurance plan that exceeds 7.5% of their household income
- Have a household size and income within certain guidelines

*The Product and Administration Copay Programs ("Programs") are valid ONLY for patients with commercial (private or non-governmental) insurance who have a valid prescription for a Food and Drug Administration (FDA)-approved indication of a Genentech medicine. The Programs are not available to patients whose prescriptions are reimbursed under any federal, state, or government-funded insurance programs (including but not limited to Medicare, Medicare Advantage, Medicaid, TRICARE, Department of Defense, or Veterans Affairs Programs) or where prohibited by law or by the patient's health insurance provider. If at any time a patient begins receiving prescription drug coverage under any such federal, state or government-funded healthcare programs, the patient will no longer be eligible for the Programs.

Under the Programs, the patient may be required to pay a copay for drug costs and a copay for administration costs. The final amount owed by a patient may be as little as \$0 for the Genentech medicine or administration of the Genentech medicine (see Program specific details available at the Program website). The total patient out-of-pocket cost is dependent on the patient's health insurance plan. The Programs assist with the cost of the Genentech medicine and the administration of the Genentech medicine only. It does not assist with the cost of other administrations, medicines, procedures or office visit fees. After reaching the maximum Programs' benefit amounts, the patient will be responsible for all remaining out-of-pocket expenses. The amount of the Programs' benefits cannot exceed the patient's out-of-pocket expenses for the cost of the Genentech medicine or administration fees for the Genentech medicine.

All participants are responsible for reporting the receipt of all Programs' benefits as required by any insurer or by law. The Programs are only valid in the United States and U.S. Territories and are void where prohibited by law. The Drug Copay Program shall follow state restrictions in relation to AB-rated generic equivalents (e.g., MA, CA) where applicable. The Administration Copay Program is not valid for patients who reside or receive treatment in a restricted state (e.g., Massachusetts or Rhode Island). No party may seek reimbursement for all or any part of the benefit received through the Programs. The value of the Programs is intended exclusively for the benefit of the patient. The funds made available through the Programs may only be used to reduce the out-of-pocket costs for the patient enrolled in the Programs. The Programs are not intended for the benefit of third parties, including without limitation third party payers, pharmacy benefit managers, or their agents. If Genentech determines that a third party has implemented programs that adjust patient cost-sharing obligations based on the availability of support under the Programs and/or excludes the assistance provided under the Programs from counting towards the patient's deductible or out-of-pocket cost limitations, Genentech may impose a per fill cap on the cost-sharing assistance available under the Programs. Submission of true and accurate information is a requirement for eligibility and Genentech reserves the right to disqualify patients who do not comply with Genentech Program Terms and Conditions. Genentech reserves the right to rescind, revoke or amend the Programs without notice at any time.

Additional terms and conditions apply. Please visit the copay Program website for the full list of Terms and Conditions.

†The completion and submission of coverage- or reimbursement-related documentation are the responsibility of the patient and health care provider. Genentech makes no representation or guarantee concerning coverage or reimbursement for any service or item.

‡Genentech provides coverage and reimbursement services to patients to help them understand benefits, coverage and reimbursement. Genentech provides these services to patients only after a health care provider has prescribed a Genentech product.

§Genentech reserves the right to modify or discontinue the program at any time and to verify the accuracy of information submitted.

Indications

VABYSMO (faricimab-svoa) is a vascular endothelial growth factor (VEGF) inhibitor and angiopoietin-2 (Ang-2) inhibitor indicated for the treatment of patients with Neovascular (Wet) Age-Related Macular Degeneration (nAMD), Diabetic Macular Edema (DME), and Macular Edema following Retinal Vein Occlusion (RVO).

Important Safety Information

Contraindications

VABYSMO is contraindicated in patients with ocular or periocular infection, in patients with active intraocular inflammation, and in patients with known hypersensitivity to faricimab or any of the excipients in VABYSMO.

Warnings and Precautions

- Endophthalmitis and retinal detachments may occur following intravitreal injections. Patients should be instructed to report any symptoms suggestive of endophthalmitis or retinal detachment without delay, to permit prompt and appropriate management.
- Increases in intraocular pressure have been seen within 60 minutes of an intravitreal injection.
- There is a potential risk of arterial thromboembolic events (ATEs) associated with VEGF inhibition.
- Retinal vasculitis and/or retinal vascular occlusion have been reported. Patients should be instructed to report any change in vision without delay.

Adverse Reactions

The most common adverse reactions (≥5%) reported in patients receiving VABYSMO were cataract (15%) and conjunctival hemorrhage (8%).

You may report side effects to the FDA at (800) FDA-1088 or www.fda.gov/medwatch. You may also report side effects to Genentech at (888) 835-2555.
